SUMMARY

Software developer graduating in December 2026 with a B.S. in Computer Information Technology. Built production Python integrations and ETL pipelines over REST and SOAP APIs for an aviation safety platform, with automated tests and GitHub Actions CI/CD, delivered with external partner developers. Hands-on with agentic AI (LangGraph), Agile development, technical documentation and client-facing communication.

EXPERIENCE

Brazos Safety Systems (aviation safety software)Fort Worth, TX
*Intern and Student Contributor*Sep 2025 - Aug 2026

- Built a production integration between the company's Django portal and GPMS Foresight, a helicopter health and usage monitoring (HUMS) platform: a FastAPI, SQLAlchemy and PostgreSQL service with hourly polling, JWT token renewal and ETL of flight data monitoring (FDM) exports with CSV parsing and deduplication.
- Wrote pytest suites and a GitHub Actions CI/CD pipeline that runs them against a PostgreSQL service container and builds multi-platform Docker images.
- Built an API pipeline that takes flight operational quality assurance (FOQA) data from FlightSpan and sends Vref data to the Polaris endpoint over SOAP, delivered from a phased plan with external partner developers.
- Built a weather integration API that feeds real-time METAR data into the FDM platform's flight-safety analysis, as part of an Agile team delivering a weather-driven analytics module.
- Wrote integration plans and phase handoff documentation used by partner developers and AI coding agents.

Teralogix (early-stage startup)Naples, FL
*Software Engineering Intern*Jun 2025 - Aug 2025

- Helped build the proof of concept for Cristos, an AI-driven workflow platform that automates virtual actions, using Node.js, Python and LangGraph agent workflows, working with engineers and product leads.

Texas Christian University, Information Technology Fort Worth, TX
*IT Intern*Jan 2023 - Apr 2025

- Resolved 80+ IT issues per semester for students and staff: troubleshooting, software installs and updates, security compliance.

PROJECTS

Froggie 5-O, campus-safety ride-sharing web app*Node.js, Express, React, PostgreSQL, Socket.io*

- Built real-time ride requests, chat and location tracking, with authentication, sessions and PostgreSQL persistence on an Express server and a React UI.

Hogwarts Artifacts Online, course project*Java 17, Spring Boot, Spring Data JPA, JUnit, Mockito*

- Built a multi-layered REST API (controllers, services, repositories, DTO converters) with full CRUD over a one-to-many JPA data model, centralized exception handling and 33 automated unit and controller tests.

EDUCATION

Texas Christian University Fort Worth, TX
*B.S. Computer Information Technology (Department of Computer Science), GPA 3.5*Expected Dec 2026
Honors: Chancellor's Scholar, Trustee's Scholar, Dean's List
Relevant coursework: Machine Learning (gradient descent optimization), Cloud Computing, Networking, Databases, Cybersecurity

African Leadership Academy, Johannesburg, South Africa: Cambridge A-LevelsAug 2020 - Jun 2022

SKILLS

Programming: Python (back end and scripting), Java, JavaScript, SQL, HTML, CSS, C (basic)
Frameworks and APIs: Django, FastAPI, Spring Boot, Node.js, Express, SQLAlchemy, REST APIs, SOAP, JWT authentication
Data and AI: PostgreSQL, ETL and ingestion pipelines, LangGraph (agentic AI)
Testing and DevOps: pytest, JUnit, Mockito, GitHub Actions CI/CD, Docker, Git, Linux (coursework), Azure, AWS (S3)
Tools and front end: VS Code with GitHub Copilot, Cursor, React, Vue.js, TailwindCSS, Socket.io
Languages: Arabic, French, English (fluent); German, American Sign Language (basic)

LEADERSHIP AND ACTIVITIES

- **Student Ambassador, TCU** (2022 - Present): campus and VIP tours; Chancellor's Panel and International Student Panel.
- **Co-Founder, CodeInn**, Sousse, Tunisia (2016 - 2019): grew a youth coding initiative to three regions; taught 300+ students.
- **Team Leader, Everse**, Johannesburg (2021 - 2022): ALA-funded project bringing affordable tech to 30+ remote African artists.
- **Programs:** Google Hackathon 2026 (hardware track), Yale Young Global Scholars 2018, LaunchX 2019 (University of Michigan).
